

ALUMINUM STRIP

HOT TANK • CABINET SPRAY • CIP • STEAM • PRESSURE
DOES NOT LEAVE A HEAVY WHITE POWDER RESIDUE

Buffered, super concentrated alkaline liquid for industrial cleaning and paint stripping of aluminum and aluminum alloy parts. Easy to use, low foaming liquid cleaner with heavy duty penetrants, detergents, chelates and soil peptizing aids for rapid removal of the most stubborn soils without leaving the heavy white powder residue common to normal silicated aluminum cleaners. Extremely effective for use in circulation cleaning systems, hot soak tank or boil out cleaning and hot spray cabinet cleaning of aluminum parts. Excellent for steam and pressure cleaning of all surfaces including most soft metals when used as directed. Safe for use on aluminum sheet and casting alloys, magnesium alloys, steel stainless steel and nickel alloys.

***** Not for heavy duty cleaning of tin, galvanized steel, zinc alloys, copper or brass because it can darken the metal on long exposure.**

DIRECTIONS

Handle concentrate with care. Dilute with water for use. Always use enough cleaner to rapidly remove soil. Follow manufacturer's instructions carefully for the proper operation of cleaning equipment.

Hot tank or spray cabinet and paint stripping	12-20 oz/gallon.
Heavy duty circulation cleaning	8-12 oz/gallon.
Kettle boil out and food plant CIP cleaning	4-10 oz/gallon.
Steam pressure and manual cleaning	2-4 oz/gallon.

Cleaner can be used at all water temperatures but cleans most effectively when used at 180° to 200°F. After cleaning, thoroughly rinse surfaces with hot water to remove all soil and cleaner residues.

FOR INDUSTRIAL USE ONLY

CAUTION: Keep out of the reach of children. Contains strong alkaline builders. Severe eye irritant. Avoid contact with eyes and skin. Flush eyes well with water and get medical attention. Wash from skin immediately. Remove contaminated clothing, wash and dry before reuse.
