

CHICK CLEAN

WETTING AGENT FOR POULTRY SCALD BATH

NON-TOXIC NON-HAZARDOUS NON-IRRITATING NON-SENSITIZING

Concentrated wetting defoaming agent that is USDA approved for use in poultry scald vats. Improves the wetting and penetrating of scald water to make feather removal easier and prevents undesirable foaming. Improves poultry quality by improved wetting of the feathers at lower scald temperatures which allow the skin to retain its natural yellow color, reduces skin damage during feather removal, provides improved cleaning and prevents undesirable foam build up during processing. Odorless and tasteless when diluted for use. Does not alter the water retentive of the poultry.

DIRECTIONS

- ❖ Make up a fresh scald bath daily
- ❖ Add the wetting agent at .01% - 06% by weight or 1-5 pounds per 1000 gallon of scald water make up (Always use enough wetting agent to control foam and promote loosening of the feathers)
- ❖ For loss of scald water due to carry over by the poultry, add wetting agent and water to the bath as needed in the same ratio recommend

FOR INDUSTRIAL USE ONLY

CAUTION: Keep out of the reach of children. Mild eye irritant. Wash from eyes with water until irritation stops. Ingestion of concentrate can cause severe diarrhea. If ingested, drink lots of water and see a physician.
