

EXTRA FOAM

FOAM ADDITIVE FOR ACID OR ALKALINE CLEANING

Highly concentrated synthetic detergent specifically formulated to create heavy foam in alkaline or acid cleaning solution. Produces a thick, stable foam with excellent penetrating and clinging power for increased wetting, detergency and cleaning. When used alone it is also an excellent all purpose cleaner. USDA authorized for use in federally inspected meat and poultry plants. Also excellent for industrial and building cleaning, truck and trailer washing and all areas where improved detergency and the longer term cleaning action of clinging foam will improve cleaning.

DIRECTIONS

Use foam generating equipment according to instructions. Follow the label directions to prepare a cleaning solution from alkaline or acid cleaners. Add enough foaming additive (½ to 2 ounces per gallon) to the final cleaning solution until the soil is loosened. Use the foaming additive by itself at least 2 to 4 ounces per gallon of hot water for manual and foam cleaning of oily and greasy surfaces. Rinse all surfaces free of detergent residues and soils with water.

FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY

Caution: Keep out of the reach of children. Mild eye irritant. If eye contact occurs; wash eyes with water until irritation stops. If ingested, drink lots of water.
