

MASONRY SCRUB OS

OIL SEPARATION TYPE MACHINE FLOOR CLEANER

A new type of heavy duty floor cleaner specifically formulated for use in modern automatic scrubbers that separate the oily soils from the cleaning solution and recycle it for more economical usage. It rapidly removes the most difficult rubber tire marks, heavy greases, oils and other stubborn soils from concrete and similar hard surfaced floors then allows them to rapidly split from the cleaning solution so that they can be removed by an oil separator. The perfect cleaner for concrete, slate, marble, stone, brick, terrazzo, quarry tile, ceramic tile and similar floors. Also excellent for use in standard automatic floor machines where the oils will float to the top of the cleaning solution for easy removal.

DIRECTIONS:

Dilute the concentrate with water for use. For machine cleaning follow the manufacturer's instructions for each machine. Use machines equipped with heavy duty brushes and modern oil separators that allow extended cleaner solution recycle for the best cleaning results and most economical use. For older machine designs; allow the oils to float to the top of the cleaning solution and remove the oil layer manually. Following the dilution guide below, adjust the use dilution for easy soil removal.

General Cleaning	1 to 3 ounces per gallon
Heavy Duty Floor Cleaning/Degreasing	4 ounces per gallon
Extra Heavy Duty Degreasing	8 ounces per gallon
Rapid Rubber Tire Mark Removal	16 ounces per gallon

FOR INDUSTRIAL USE ONLY

CAUTION: Keep out of the reach of children. Concentrate will irritate eyes. If accidental contact occurs wash eyes with water until irritation stops. If irritation persists see a physician. If taken internally it will cause severe diarrhea. Drink lots of water and see a physician. Treat as soap or detergent digestion.
