

NO MOLD XP

HEAVY DUTY MOLD & MILDEW REMOVER

Extra heavy duty, mildly alkaline chlorinated mold and mildew remover. Powerful penetrating detergents carry the remover rapidly through soils and porous materials to instantly control the mold and its spores at their source. Removes and controls mold on wood, wood chips, sawdust, bathroom tile and surfaces, concrete, outdoor wooden decks, basements and food processing areas. NO MOLD XP is safe on all surfaces that can be cleaned with water and will tolerate bleaching by low levels of active chlorine bleach.

DIRECTIONS

Wear complete protective clothing, rubber shoes and goggles or face mask when applying or mixing the cleaner.

Dilute 5 to 10 with cold water for use. Apply to the surface with low pressure spray (plastic applicator or of this nature required) from a coarse non-misting nozzle until thoroughly saturated. Allow the remover to remain on the treated surface for five to ten minutes and then rinse off mold and cleaner with a pressure washer for best results. If a pressure washer is not available use a long handled brush to loosen the dead mold, and rinse with a hose. Allow the surface to dry, then treat with the same dilution and allow the remover to remain and dry on the treated surface for longer term protection.

In circumstances where mold and mildew elimination is required and rinsing is not applicable, product may be applied as directed above with a low pressure spray and left to dry without rinsing. Any remaining residues can be removed with regular cleaning as needed.

Note: Provide good ventilation during and immediately after the treatment to provide a safe chlorine free work area.

FOR INDUSTRIAL USE ONLY

CAUTION: Keep out of the reach of children. Contains Sodium Hypochlorite. If eye or skin contact occurs wash off immediately with water until irritation stops. If irritation persists see a physician. Wash from skin with water. Remove contaminated clothing and wash before reuse.
