

# POLYSOLV C

## POWERFUL-CATIONIC POLYMER SOLVENT

Concentrated cationic polymer solvent formulated to rapidly dissolve and remove slick and dangerous coagulant polymer residues from floors, stairs, ladders and other walkways. It is also used to remove polymer residues from automatic feed equipment including meters, hoses, piping and belt presses. Rapidly breaks the cohesion bond between the polymer molecules and the surface to which they have adhered to so they can be rinsed away with water.

### DIRECTIONS

**GENERAL PURPOSE CLEANING:** Dilute 1 part solvent to 10 to 20 parts. Safe on the hands and all hard surfaces. Effective on all polymers but superior on cationic types. Use solvent neat or dilute 1/1 to 1/3 with water for use. Most effective if allowed soaking in the polymer spill for 5 to 10 minutes.

**FLAT SURFACES:** Apply liberally and allow remaining a few minutes. Agitate with a stiff brush, and then flush well with water.

**FEED EQUIPMENT:** Recirculate solvent until the polymer is free flowing, then rinse away polymer residue with water.

**BELT PRESSES:** Slow the belt and spray solvent for 2 or 3 cycles. Allow belt to rotate for 3 more cycles, and then rinse with water. Repeat if required.

### FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY

**CAUTION:** Keep out of the reach of children. Eye Irritant. Wash from eyes with water until irritation stops. If it persists, see a physician. Ingestion may cause toxic symptoms. If ingested in any quantity, drink lots of water and see a physician.
