

# PURE LUBE

**HIGH PURITY LUBRICANT AND ANTIRUST FILM  
FDA ACCEPTED FOR FOOD CONTACT SURFACES**

**PURE LUBE** is an exceptionally high purity isoparaffinic petroleum solvent that is essentially odorless and has a relatively high boiling point. It is accepted under specific FDA Regulations for food related uses. It conforms to Regulation 21 CFR 178.362Ob as a white, high purity mineral oil and to Regulation 21 CFR 172.884 as a high purity, odorless, light petroleum hydrocarbon. The high chemical purity and other attractive properties allows it to be used as a lubricant or antirust film on equipment and machine parts where there is exposure of the lubricated surface to edible food products. It is also used as a release agent on gaskets of tank enclosures.

## DIRECTIONS

### **DO NOT USE NEAR FIRE OR OPEN FLAMES.**

Always apply with a clean cloth, sponge or brush. Never by spraying or misting. Use the minimum required to do the job. If used as an antirust film, wipe the surface clean of the solvent before using it for food processing. The solvent can be removed from the treated surface with detergents, and then washed away with water.

## FOR INDUSTRIAL USE ONLY

**CAUTION:** Keep out of the reach of children. Combustible solvent. Do not use near fire or other source of combustion. Mild eye irritant. If contact occurs, flush eyes with water. Wash from skin with soap and water. Ingestion causes severe diarrhea. If ingested see a physician immediately. Wash contaminated clothing before reuse.
